March 2012

Holy Spirit Northside welcomes Mater Pathology

Northside Pathology is undergoing a management and operational change.

Effective from 5th March 2012, Northside Pathology's laboratory testing services will be transitioned from the current provider, Pathology Queensland to Mater Pathology.

Mater Pathology a well-established and experienced pathology provider, will provide a pathology laboratory testing and collection centre from within Holy Spirit Northside.

The five existing pathology collection centres located in the northern suburbs of Brisbane will also be supported by Mater Pathology.

HSN General Manager Daniele Doyle said, "Mater Pathology have built a new and innovative onsite stat laboratory, to provide timely and improved testing and reporting services to our medical community here at Holy Spirit Northside.

HSN is an acute tertiary Catholic hospital and has many synergies with the Mater Health Services. I was very pleased to be able to offer this opportunity to Mater Pathology.

The expert medical pathology services that will be onsite here at HSN will have the capacity to support this Hospital's very complex casemix."
